

# NYC Schools Challenge Example

---

**Description:** Create an iOS app that provides information on NYC High schools. Display a list of NYC High Schools.

**School List Source API:**

Get your data here - <https://data.cityofnewyork.us/Education/DOE-High-School-Directory-2017/s3k6-pzi2>

**SAT Source API:**

SAT data here - <https://data.cityofnewyork.us/Education/SAT-Results/f9bf-2cp4>

**UI Note:** Selecting a school should show additional information about the school. Display all the SAT scores - include Math, Reading and Writing.

## What are we looking for from this exercise?

- a) A fully working prototype.
- b) Don't worry about making the UI pretty.
- c) Tech approach you took and why.
- d) What was important to you – look and feel or the functionality?
- e) Unit test coverage.
